This idyllic 17 acres lot is located in the mountains of Uvita, at 400ft. above sea level. At the entrance of the property, you will find the first of the 3 cut building sites with a gravel driveway. Two of the sites has tropical jungle views and the third has a southern ocean view looking out to the Piedra Ballena. On the upper side, there are two more building areas. One of them has an incredible view to the Whale's Tail and the second one offers a very private site with jungle and ocean view. Much of this property is primary forest with very large trees that attract lots of wild life all day long. This is a paradise for those who are animal lovers. With this many areas to build within one property it could be an opportunity to start a business, or split off some of the land and sell it. Chances are endless!
