Here is one of National Geographic's most favorite places on planet Earth!  
Located along the Piedras Blancas National Park, this magical property features beautiful wooded grounds, open pasture, including a secluded private beach with an intriguing rock that produces the tastiest spring water ever. This fantastic piece of land has 2 separate titles, a 156 acres farm and over 13 acres of maritime zone property boarded by rivers on each side, really unique!  
A current zoning permit (Uso de Suelo) allows for 60% of the land to be developed with respect to the environmentally sensitive areas. You can create a resort or preserve nature, both opportunities are available.  
In this marvellous land you can also enjoy a long coastline with a coral reef which attracts all sorts of marine life, the humpback whales with their newborns, dolphins and breed all year-round. There are no words to describe this unique gem. Contact us to schedule a visit to this nature real masterpiece!
