750 ACRES of Costa Rican rain forest and pasture located in the southern zone of Costa Rica! This is a monstrous amount of land with many possibilities! Hills, rivers, streams, primary rainforest, and views of the Sierpe river and ocean. A land to be treasured... This is best suited for someone who has a deep interest in protecting the environment. Much of this land is already enrolled in the FONAFIFA program which provides owners with a modest income in return for protecting the land. The property can be enrolled in the program or the land could be repurposed. An eco establishment would bode well here as it will still preserve the environment and provide an experience for others who wish to learn about the land. If more acreage is desired, the owner is willing to offer an additional 1,100 plus of acres of additional property adjacent that could also be added to the area that will be protected. Partial owner financing is considered by the owner.
